

Breakdown of costs involved(Excluding GST)	Rabbit (Male)	Rabbit (Female)
Sterilisation & Anaesthesia	\$180	\$200
Sterile Surgical Pack & Suture Set (The number of suture packs used may vary depending on the complexity of the surgery)	\$38	\$38
Synulox Antibiotic & Tramadol Pain Relief Injection	\$30	\$30
Take-home medications <i>(Oral antibiotics & pain relief, wound cleanser & cream.)</i>	\$44	\$44
Pre-anesthetic checkup <i>(A physical check-up on the pet's health condition to understand your pet's health better before the procedure, especially if it is your pet's first visit to the clinic. (Additional charges may be applied for other medications needed based on the diagnosis of the check-up)</i>	\$25	
Estimated total:	\$315-325 and above	\$335-345 and above

Additional recommended items as below:

Post-Surgery Essential:

Elizabeth Collar (This is prescribed after the surgery to prevent infection or opening the stitches caused by licking at the incision site. Other alternatives are not advised.)	\$13-\$18
--	------------------

Additional Charges:

Pre-Anaesthetic Blood Work (Strongly recommended to enable detection of any pre-existing conditions the pet may have which will potentially increase the risks of anaesthesia, especially in pets over the age of 7 and pets who have never undergone general anaesthesia before.)	\$195 or more
Microscopic check of fur (A microscopic check of your pet's fur is a mandatory part of our pre-surgical screening. This examination helps us identify any potential skin parasites such as mites or fungi. Parasite infestation can increase the risk of surgical site infections. Treating the infestation before surgery helps ensure a smoother and safer recovery for your rabbit. This examination is crucial for the health and safety of your rabbit and other animals in the clinic.)	\$15
RADIOGRAPHS (Radiographs before anesthesia ensure your pet's safety by assessing heart and lung health, detecting hidden conditions, guiding anesthetic plans, and identifying potential risks, especially in older or sick animals. This helps minimize complications and tailor care for the best outcomes.)	\$180 or more
